Knight Light

The Knight Light brings a playful and bold presence to lighting. Originally inspired by an exploration of structure and negative space, the contemporary form features a striking void that casts directional light. Made from spun, laser-cut metal and powder-coated in four colourways, the lamp balances visual impact with everyday functionality. Fitting an E14 bulb, it features a dimmable in-line switch to adjust brightness and warmth to suit your environment.

Part of the David Moreland Design collection, the Knight Light was first designed in 2009 and reintroduced in 2026 with an updated scale and fresh colour palette. Please note: E14 dimmable LED lightbulb (max 25 watts) not included.
