Port Table Lamp

The Port Table Lamp expands the Port lighting family. Continuing the design typology, the mouth-blown glass lamp has a rounded form inspired by the graceful contours of a port bottle. Opal glass gently diffuses the light to cast a warm and ambient glow.

The flowing form discreetly houses the bulb holder within the lamp, creating a clean silhouette. Designed to fit an E14 bulb and featuring a dimmable in-line switch, it offers flexibility to adjust the brightness and warmth to suit your environment.
